

The image shows a man in a call center environment, wearing a headset and looking at a computer monitor. The monitor displays a table with columns for 'NAME', 'Phone No.', 'Address', 'City', 'Description', and 'Status'. The man is smiling and has his hand near his chin, suggesting he is engaged in a conversation or looking at the data on the screen.

NAME	Phone No.	Address	City	Description	Status
Schmidt	0627708	Super Boulevard 21	911	Hardware programs	Healthy
Larson	0627709	1st Street 45	106	Hardware items	Available
Wilson	0627710	Peering Street 24	903	Hardware programs	Healthy
Schmidt	0627711	Madison St	612	Hardware programs	Healthy
Larson	0627712	Wilson Street 48	106	Hardware programs	Available

# EPOS and 10ZiG

Manage Your EPOS Audio Devices Seamlessly  
on 10ZiG Windows 10 IoT Client Endpoints

EPOS, a manufacturer of high-end audio solutions designed for better communication and collaboration, and 10ZiG, a leading provider of virtual desktop endpoint hardware and software, have partnered to deliver EPOS audio devices and management software optimized for 10ZiG Windows 10 IoT Client device models.

## EPOS Digital Solutions

### **EPOS Connect VDI - optimize your audio experience**

EPOS Connect VDI is the client application that enables various asset management features that allow IT managers to administer EPOS audio devices across the entire organization through the intuitive EPOS Manager UI.

### **EPOS Manager - stay updated, boost business**

EPOS Manager is a powerful on-premises or cloud-based IT management solution enabling IT managers to manage, update, and configure their organization's EPOS headsets and speaker phones from any location.

#### **Benefits:**

- 1. Firmware updates:** Roll out updates across locations to minimize downtime
- 2. Remote asset management:** Get the overview of all EPOS devices in your organization
- 3. Remote device configuration:** Configure audio devices to comply with your organization's IT policies

## 10ZiG Endpoints - go virtual, no matter your location

10ZiG Technology provides virtual desktop Thin & Zero Client endpoints and centralized management software (10ZiG Manager™) for VDI, DaaS, SaaS, and Cloud-based workspaces. A front-runner in many VDI innovations including leading audio & video communication support, 10ZiG works to make product fit into the customer's computing environment, not the other way around. In office or at home, 10ZiG virtual desktop technology maximizes traditional, remote, or hybrid-working setups.

## EPOS & 10ZiG - powerful focus and productivity

10ZiG Windows 10 IoT Client device models **4610q**, **6010q**, and **6110** work seamlessly with EPOS headsets and speakerphones including the **ADAPT 660**.
