EPOS announces additional certifications for Alcatel-Lucent Enterprise Soft Phone Clients and Desk Phones

Copenhagen, Denmark – January 21, 2020 – The premium audio solutions company, EPOS – part of the Demant Group – announces new certification for ADAPT 360, ADAPT 460, ADAPT 560, ADAPT 660 and EXPAND 80 with Alcatel-Lucent Enterprise – a leading provider of communications, networking and cloud solutions tailored to customers' industries. All certified products provide Call Control interoperability for the Alcatel-Lucent Enterprise Soft Phone Clients and Desk Phones.

Together, EPOS and Alcatel-Lucent Enterprise completed compatibility tests to guarantee the most effective interoperability between certified EPOS headsets and Alcatel-Lucent Enterprise. These follow the Alcatel-Lucent Enterprise guidelines for certification. The devices are tested acoustically and for Call Control functionality and interoperability with Alcatel-Lucent Enterprise Soft Phones Clients and support additional features like Answer Call, End Call, Mutes Sync, Volume control etc. This certification with Alcatel-Lucent Enterprise completes a full portfolio of certified headsets and conference devices that are supporting modern hybrid workplaces.

The compatibility testing aligns the two companies with a focus on high-quality and user-friendly products. A mutual dedication to quality and interoperability in their respective fields makes this a natural step to offer customers adapted solutions. In order to have full Call Control interoperability with Alcatel-Lucent Enterprise Desk Phones, EPOS developed special EHS adapter cables for DECT headsets (E.g. IMPACT SDW 5000 series and IMPACT DW series) to be connected to Alcatel-Lucent Enterprise Desk Phones (4000, 8000 and 8000s series, both IP and TDM versions).

For the Rainbow™ by Alcatel-Lucent Enterprise Soft Phone Client, a cloud based communication platform that empowers organisations and individuals to connect and collaborate efficiently with colleagues, business contacts, and customers, the Call Control interoperability is provided through the EPOS Connect application.

Theis Mørk, Vice President of Product Management, Enterprise Solutions, at EPOS adds: "We are thrilled to announce further certifications of our leading audio solution for our Strategic Alliance partner Alcatel-Lucent Enterprise. It is an important step for us to provide a full portfolio of high-quality products for the modern workers".

"Our main objective has always been to deliver intuitive, simple and convenient communication solutions to our customers. The partnership with EPOS is making our mission even more tangible than before, delivering the capability to use extended call control features directly from their hardware," concludes Samuel Tourbot, Head of the Alcatel-Lucent Enterprise Cloud Business Engine.

About Alcatel-Lucent Enterprise

Alcatel-Lucent Enterprise delivers the customised technology experiences enterprises need to make everything connect.

ABOUT EPOS

EPOS is an audio and video solution company developing and selling devices for business professionals and the gaming community. Based on leading and advanced technologies, the Danish founded company delivers high-end audio and video solutions with design, technology and performance as paramount parameters.

The establishment of EPOS is based on the decision to let the business segments of the joint venture – known as Sennheiser Communications – between Sennheiser Electronic GmbH & Co. KG and Demant A/S evolve in different set-ups. Alongside the introduction of a new own-branded portfolio, EPOS continues to sell the current Sennheiser Communications portfolio co-branded as EPOS | SENNHEISER.

EPOS is part of the Demant Group – a world-leading audio and hearing technology group. As such, it builds on more than 115 years of experience of working with innovation and sound. With headquarters in Copenhagen, Denmark, EPOS operates in a global market with offices and partners in more than 30 countries.
