

Optimize Your Audio Devices for Thin Clients

If your organization is using thin clients, EPOS offers device management software to help you stay in control of your audio assets. Our device management software integrates seamlessly with VDI solutions meaning your IT department can stay in control of every audio device companywide.

EPOS Device Management Solutions

EPOS provides two interconnected audio device management solutions for thin clients – EPOS Connect and EPOS Manager – these are both compatible with VDI solutions and enable you to optimize and update your organization's audio devices.

EPOS Connect

EPOS Connect is a client application that can be installed in a thin client. It ensures EPOS headsets and speakerphones work seamlessly with softphones and gives employees access to the latest firmware updates and personalized settings.

EPOS Manager

EPOS Manager is a powerful on premises or cloud-based IT management solution that enables you as an IT manager to manage, update and configure settings for EPOS headsets and speakerphones within an organization from any location.

EPOS Manager

With EPOS Connect installed at the endpoints of a VDI environment, EPOS audio devices can be managed with EPOS Manager via an intuitive user interface.

EPOS Manager Benefits:

- Remote asset management
- Remote device configuration
- Control firmware updates

EPOS Partnerships with Major Thin Client Software Vendors

IGEL

In close collaboration with IGEL we have created a solution that simplifies optimizing and updating EPOS audio devices.

We've integrated the client application EPOS Connect into IGEL OS and once enabled via Universal Management Suite (UMS) IT managers can then download EPOS Manager.

Unicon Software

In close collaboration with Unicon Software we have created a solution that simplifies optimizing and updating EPOS audio devices. The client application EPOS Connect can be installed on thin clients via Scout Enterprise Management Suite®. IT Managers can then download EPOS Manager.
