

EPOS Large Meeting Room Solutions

EPOS

For ~18 participants

For professionals that participate in regular, formal meetings, presentations and interviews across geographic locations in large meeting rooms.

What EPOS Delivers for Large Meeting Rooms

Stay focused – Exceptional audio and video performance ensures as natural a conversation experience as possible, providing the brain with the best conditions to stay focused on the meeting

Designed to facilitate teamwork and seamless collaboration

Large meeting rooms are intended for department meetings, board meetings, and the like.

Conferencing equipment at this scale will often require tools that enable fully-featured conferencing solutions

Kensington lock support/ clutter-free cable management

– Keep your devices where they belong and eradicate clutter

Double-talk capability

– Double talk performance in speakerphones replicates the nuances of natural conversation during a physical meeting, enabling simultaneous speech, greater collaboration and improved understanding

EPOS Solutions for Large Meeting Rooms

EPOS

Microsoft Teams

EXPAND 80 Series

- Powerful ultra-low distortion speaker fills the room with rich, natural sound
- Six beamforming microphones isolate voices from room reverb and ambient noise, making it easier for both sides of the meeting to hear clearly and concentrate
- Premium design with integrated cable management, Kensington Lock support, and up to two expansion microphones for large meeting rooms
- Designed with EPOS BrainAdapt™ technology to support the brain's natural way of processing sound, resulting in less fatigue and more focus for all meeting participants
