

EPOS Delivers Studio Broadcast Quality with B20 Streaming Microphone for Gamers

Copenhagen, Denmark – June 1, 2021 – Premium gaming audio brand EPOS revealed today the B20 broadcast microphone, unleashing next-level audio designed for gamers, streamers and content creators seeking studio-quality microphone audio. Continuing EPOS' next generation of premium peripherals, the B20 delivers uncompromised crystal-clear recording with hassle-free plug-and-play connectivity and an elegantly sleek build. The EPOS B20 microphone is compatible with PC, PS4™ and Mac®, and is available now on the official [EPOS](#) website and from select retailers.

Studio Broadcast Quality Microphone

Staying true to EPOS' 115 years of audio engineering experience, the B20 delivers clarity without sacrificing the warmth of deep bass and treble tones to achieve rich, clear and enhanced vocals. Designed for a wide range of gamers the B20 microphone boasts studio broadcast quality (24bit 48kHz) while effortlessly reducing unwanted background noise for a lag-free recording experience.

Adaptable for Many Scenarios

Expanding the B20's function and versatility, the microphone includes integrated audio controls for full control over the sound with easily-accessible volume, gain and mute buttons. When in use, intuitive LEDs indicate when the microphone is active or muted. Additionally, the B20 includes a headphone jack that allows for real-time voice monitoring and game audio mixing.

Users can further personalize a microphone experience that is best for their unique setups through the B20's four ranges of sound pickup – cardioid, stereo, bidirectional or omnidirectional. Each is intuitively designed to capture every recording scenario from solo game streams, partner casting, team-play broadcasts and more.

Sleek, High-Quality Build

Crafted with same high-quality standards of EPOS' line of premium audio peripherals, the B20 perfectly fits into gaming stations of any layout. The microphone boasts a durable yet lightweight solid aluminium shell, complemented by sleek, ergonomic design and accents. Similarly, the B20 includes a dedicated desk stand that allows for perfect fit and adjustability. The microphone's 3/8" thread seamlessly connects to boom arms for a range of added positioning options.

Intuitive Setup and Customization

The B20 microphone's USB-C to USB-A plug-and-use design delivers simple setup for aspiring content creators and seasoned streamers alike. All audio content from professional livestream sessions to elevated team chat are instantly improved through hassle-free connection for less time setting up and more time gaming.

For users seeking to further enhance the sound of the B20's audio, the EPOS Gaming Suite can be downloaded for access to an array of customization settings, including noise reduction adjustments, microphone equalizer adjustability, reverb controls and more.

"The B20 is ideal for players wishing to elevate the quality of their recording, broadcasting and audio communications. We pride ourselves on developing products that fully immerse people into games, and we are proud the B20 continues this legacy," said Maja Sand-Grimnitz, Director, Global Marketing, Gaming at EPOS.

About EPOS

EPOS is an audio and video solution company developing and selling devices for business professionals and the gaming community. Based on leading and advanced technologies, the Danish founded company delivers high-end audio and video solutions with design, technology and performance as paramount parameters.

The establishment of EPOS is based on the decision to let the business segments of the joint venture – known as Sennheiser Communications – between Sennheiser electronic GmbH & Co. KG and Demant A/S evolve in different set-ups. Alongside the introduction of a new own-branded portfolio, EPOS continues to sell the current Sennheiser Communications portfolio co-branded as EPOS | SENNHEISER.

EPOS is part of the Demant Group – a world-leading audio and hearing technology group. As such, it builds on more than 115 years of experience of working with innovation and sound.

With headquarters in Copenhagen, Denmark, EPOS operates in a global market with offices and partners in more than 30 countries.
