### EPOS announces new partnership with Code Software to enhance knowledge worker productivity and device adoption

September 30, 2020 – The premium audio solutions company, EPOS – part of the Demant Group – today announces its partnership with Code Software – a technology company delivering software to support UC&C platforms including Microsoft Teams, Cisco and Avaya. The new partnership is EPOS’ latest initiative to support device insights and management across organizations to empower knowledge worker productivity and device adoption.

Under the new partnership, Code Software will incorporate EPOS’ device details into its advanced Device Management software, ClobbaDM to support users in managing their resources better and speeding up the tasks of updating firmware and device settings, all while reducing the risk of human errors. Being part of the Clobba suite of software including analytics, reporting, recording, billing and general management tools, ClobbaDM allows for usage and quality reporting, as well as inventory and device management that allow IT managers to gain valuable insights into device allocation across an entire range of EPOS devices.

In addition, ClobbaDM allows users to monitor call quality from both EPOS devices, as well as their preferred UC&C platforms, to identify issues that might affect productivity and call quality across organizations. The software provides insights to drive user adoption and identify call quality issues, all while delivering a simple and efficient way of managing multiple devices – an intuitive single solution, which helps improve user adoption, reduce end-user troubleshooting and minimize operational costs.

Mark Armstrong, Director, Code Software, comments: “Code are delighted to be partnering with EPOS. With ClobbaDM we have a solution which strengthens our UC&C reporting and management suite. It offers companies using EPOS devices valuable insights to drive user adoption and identify call quality issues, whilst delivering a simple and efficient way of managing multiple devices.”

Theis Moerk, Vice President of Product Management, Enterprise Solutions, at EPOS adds: “We are pleased to be partnering with Code Software to offer our joint customers even further opportunities to manage their end-user devices. In the current climate, it is of great importance that we support businesses in having the right tools to increase efficiency, as well as productivity.”

### ABOUT EPOS

EPOS is an audio and video solution company developing and selling devices for business professionals and the gaming community. Based on leading and advanced technologies, the Danish founded company delivers high-end audio and video solutions with design, technology and performance as paramount parameters.

The establishment of EPOS is based on the decision to let the business segments of the joint venture – known as Sennheiser Communications – between Sennheiser Electronic GmbH & Co. KG and Demant A/S evolve in different set-ups. Alongside the introduction of a new own-branded portfolio, EPOS continues to sell the current Sennheiser Communications portfolio co-branded as EPOS | SENNHEISER.

EPOS is part of the Demant Group – a world-leading audio and hearing technology group. As such, it builds on more than 115 years of experience of working with innovation and sound. With headquarters in Copenhagen, Denmark, EPOS operates in a global market with offices and partners in more than 30 countries.
