

EPOS Connect

Take control of your audio experience
with the EPOS Connect App

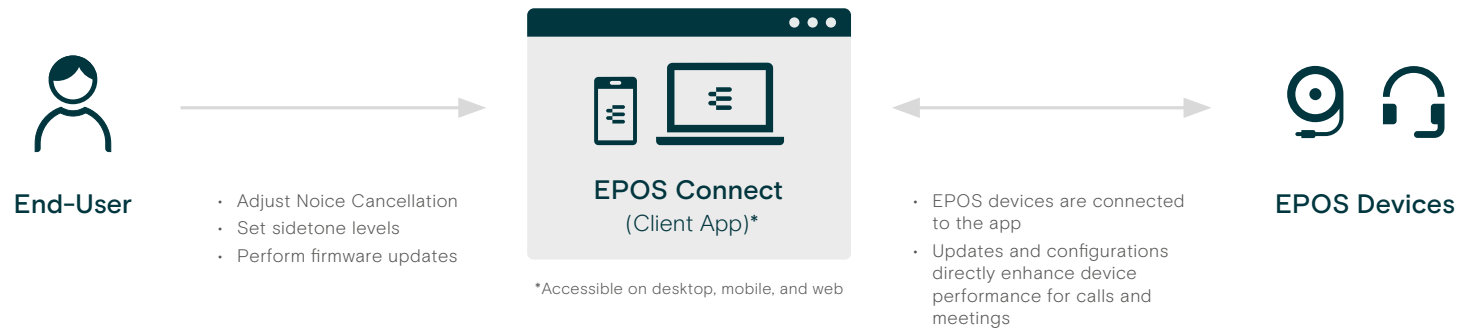

EPOS Connect is a user-friendly desktop, mobile*, and web** application designed to keep your EPOS devices seamlessly connected and updated with the latest firmware. Whether you are part of an organization using EPOS Manager for centralized device management or an individual utilizing EPOS Connect as a standalone application, this tool provides real-time updates and enables end-users to customize settings for optimal call quality and a tailored audio experience. From navigating different sound environments to taking calls on various softphones, this plug-and-play solution interfaces effortlessly with EPOS audio devices and leading communication platforms via embedded drivers.

*The mobile application supports EPOS Bluetooth® headsets.

**The web application focuses on firmware updates.

EPOS Connect

Device Control

EPOS Connect allows users to directly interact with their devices, enabling the personalization of audio settings such as noise cancellation and sidetone levels. It enhances the end-user experience by providing intuitive controls to adjust settings for calls and meetings.

Seamless Firmware Updates

With EPOS Connect, users can update firmware to ensure their devices are always up-to-date with the latest features and improvements, optimizing performance and enhancing the overall user experience.
