

# ADAPT 400 Series

An EPOS First That's Good for Business  
and Good for Your Hearing

The development of the ADAPT 400 Series completes the ADAPT Line with the first-ever in-ear, neckband headset from EPOS. Get clear communication and subtle style with the opportunity for personalized ear tips to safeguard your hearing.

## The ADAPT Line Work your way

The ADAPT 400 Series is part of the 'ADAPT Line' – a range inspired by versatile, busy professionals, enabling flawless calls in a variety of comfortable, contemporary designs. So, whether in the office or on-the-go workers can communicate and concentrate with premium headsets that offer UC Optimization and Active Noise Cancellation (ANC).

## The ADAPT 400 Series A versatile, discreet work tool

The ADAPT 400 Series delivers professional audio and call quality combined with a discreet, neckband design for convenience and portability. The headset is extremely lightweight, so you can wear it all day and barely notice it's there, plugging in one or both ear tips while on calls, and neither when not in use.

If you're waiting for that all-important business call, the neckband vibrates discreetly meaning you'll never miss it. The ADAPT 400 Series has two variants for versatile on-the-go professionals; the ADAPT 460 headset that is UC Optimized and the ADAPT 460T, enabling a seamless user experience of Microsoft Teams.

## ADAPT 400 user profile

How does the ADAPT 400 answer the needs of versatile professionals like 'Adam Loop'?

**Name** Adam Loop

**Age** 35 years

**Job title** Salesman, working in the office and on-the-go

**About** Loves good food, networking and travelling the world

Adam spends his days seeking out sales partnerships and identifying business expansion opportunities. No two days look alike – whether in the open office doing focused tasks, on calls with potential leads, or travelling to visit clients and attend trade events, he needs to be reachable anywhere.

### ADAPT 400 offers the perfect solution

- Multi-connectivity to PC and mobile for calls in the office and on-the-go
- Long battery life so users can talk all day
- Good noise-cancelling microphones
- Vibrating neckband signals
- Discreet design for a professional and stylish look
- Lightweight construction with personalized ear tips for maximum comfort

### The importance of ear tips

- It is crucial to spend time finding the right ear tips for you and here's why:
- Safeguarding your hearing – bad fit offers zero noise isolation from environmental sound forcing users to turn up the volume.
- Sound quality – The fit improves call and audio clarity and makes ANC more effective.
- Personalized fit – Asymmetrical ear canals are quite common, meaning you may have to use a different sized ear tip for each ear.
- Comfortable use – The right size affects user comfort.

### Finding the right ear tips

The ADAPT 400 Series comes with four different ear-tips sizes (XS, S, M, L). These have been developed based upon extensive research into the most common sizes and then tried and tested by real users.
